The tinted lenses contain the following color additives:

- D & C Yellow No. 18
- D & C Green No. 6
- D & C Red No. 30
- FD & C Green No. 3

The lens may be disinfected using a chemical disinfection (not heat) system – specified in the labeling directions. If dry storage is desired (stored). If dry storage is desired – (stored).

- Allergic reactions of ocular surfaces or adnexa that may be induced or aggravated by wearing contact lenses.
- Acute and subacute inflammation or infection of the anterior chamber or affecting the cornea.
- Any eye disease, injury, or abnormality that affects or may be affected by wearing contact lenses.
- Any systemic disease that may affect the eye or be exacerbated by wearing contact lenses.
- Any eye infection or eye disease.
- Do not wear contact lenses while sleeping. Clinical studies have shown that patients who wear contact lenses while sleeping.
- Contact lenses gently and avoid dropping them on hard surfaces.
- Always handle lenses carefully and keep them away from extreme heat.
- Discard the lens if the patient is unable to follow lens care regimen or unable to obtain assistance to do so.
- Patients should be instructed to avoid using any oil-based AMD for use with all lenses.
- Contact lenses are not indicated for overnight wear, and patients should avoid wearing contact lenses while sleeping.
- Patients should be instructed to immediately remove lenses and promptly contact his or her Eye Care Practitioner.

PROBLEMS WITH CONTACT LENSES AND LENS CARE PRODUCTS

Problems with contact lenses and lens care products could result in serious eye infections. It is essential that the patient follow the care practitioner’s directions and all labeling instructions for proper use of lenses and lens care products. Contact lenses and lens care products are medical devices, including contact lenses, contact lens care products, and lens preservatives, can develop rapidly and lead to loss of vision.

- Patients should be instructed to not wear lenses while sleeping.
- Studies have shown that contact lens wearers who are smokers have a higher incidence of adverse reactions than non-smokers.
- If a patient experiences eye discomfort, excessive tearing, vision changes, or redness of the eye, the patient should contact his or her Eye Care Practitioner immediately.

ADVERSE REACTIONS

The patient should be informed about the following results for contact lenses.

- Eye Care Practitioners should instruct the patient to remove the lenses immediately if the eye becomes red or irritated.
- The presence of the ultraviolet (UV) light absorber in the contact lens material can provide equipment enhancement to visualize fluorescent patterns adequately.
- Eye Care Practitioners should carefully instruct patients about the following care regimen and safety precautions:

- Different solutions cannot often be used together, and not all solutions are safe for use with all lenses.
- Use only recommended solutions.
- Do not heat the conditioning/storage solution and/or lenses. Keep them away from extreme heat.
- Always use fresh unexpired lens care solutions.
- Follow the directions in the package inserts for the use of contact lens solutions.
- Use only a chemical (not heat) lens care system.
- Do not use saliva or anything other than the recommended solutions for lens care.
- Sterile unpreserved solutions, when used, should be discarded after the time specified in the labeling directions.
- Always keep the lenses completely immersed in the recommended storage solution when the lenses are not being worn (stored). If dry storage is desired to store the lenses for a longer period of time, they must first be cleaned, rinsed with water and carefully dried by blotting with a clean, dry lens storage case. Ideally, these lenses should be cleaned and disinfected prior to insertion.
- If the lens sticks (stop moving) on the eye, the patient should be instructed to follow the recommended directions on Care for a Sticking Lens. The lenses should move freely on the eye for the continued health of the eye. If nonmovement of the lens continues, the lens should be instructed to immediately consult his or her Eye Care Practitioner.
- Always wash and rinse hands before handling lenses. Do not get any non-food, cosmetic, or other substances into the eyes or on the lenses. If it is best to put on lenses before putting on makeup. Water-based cosmetics are less likely to damage lenses than oil-based products.
- Do not touch contact lenses with the fingers or hands if the hands are not free of foreign materials, as microscopic scratches on the lenses may occur, causing distorted vision and/or injury to the eye.
- Carefully follow the handling, insertion, removal, cleaning, disinfecting, storing and wearing instructions prescribed by the Eye Care Practitioner.
- Never wear lenses beyond the period recommended by the Eye Care Practitioner.
- If aerosol products such as hair spray are used while wearing lenses, exercise caution when applying. If the spray has set in the eye.
- Always handle lenses gently and avoid dropping them on hard surfaces.
- Always keep the lenses in the recommended storage solution.
- Instruct the patient to ask his or her Eye Care Practitioner about wearing lenses during activities and other sports.
- Instruct the patient to inform his or her health care practitioner (doctor) that the patient wears contact lenses.
- Never use tweezers or other tools to remove lenses from the lens case unless instructed by the doctor for that use. Pour the lens liquid into a free tissue prior to being placed in a clean, dry lens storage case. Ideally, these lenses should be cleaned and disinfected prior to insertion.
- Ask why contact lenses, follow-up visits are necessary to assure the continued health of the patient’s eyes. The patient should be instructed as to a recommended follow-up schedule.
- Problems with contact lenses and lens care products could result in serious eye infections. It is essential that the patient follow the care practitioner’s directions and all labeling instructions for proper use of lenses and lens care products. Contact lenses and lens care products are medical devices.
- Contact lenses are not indicated for overnight wear, and patients should avoid wearing contact lenses while sleeping. Clinical studies have shown that the risk of serious adverse reactions is increased when these daily wear lenses are worn overnight.
- Studies have shown that contact lens wearers who are smokers have a higher incidence of adverse reactions than non-smokers.
- Contact lenses should never be shared between users.

ADVERSE REACTIONS

The patient should be informed that the following problems could occur:

- Eyes stinging, burning, itching (irritation), or other eye pain.
- Comfort is less than when lenses was first placed on the eye.
- Fearing that something is in the eye such as a foreign body or an eyelash.
